# TD SYNNEX NetApp with FSx on AWS Click-to-Run™

## Click to Run Solutions from TD SYNNEX

## Business Challenge

Your customers are constantly striving to optimise their use of critical applications, workload scalability and performance, and migrations of data and applications to the cloud. They need a cloud-based file system that can support large datasets without their having to worry about file servers and storage volumes.

## Introducing NetApp with FSx

Help your customers simplify and speed up workload migrations to the cloud with this Click-to-Run™ solution that uses the Amazon Web Services (AWS) FSx Managed File system and NetApp ONTAP.

With this scalable, high-performing solution, your customers will be able to easily grow their data sets in a secure and reliable environment at a fraction of the cost of on-premise storage technologies.

You can get this solution on our StreamOne® Ion platform and deploy it in minutes.

### Key Features:

- Simple administration with AWS or ONTAP
- Data migration with SnapMirror Replication
- Instantaneous cloning with FlexClone
- Multi-protocol accessibility: NFS, SMB, iSCSI

### Business Outcomes:

- Optimise costs and efficiencies
- Improve business agility
- Manage data more effectively
- Monitor and analyse hybrid cloud activity
- Migrate and modernise applications faster

## Why leverage TD SYNNEX's Click-to-Run™ solutions?

**Reduce costs, save time**

Reduce costs and risks and save time by customizing and deploying pre-architected, validated and tested solutions.

**Offer more – get more**

Enhance your portfolio and increase your revenue by offering more options and solutions to your customers.

**Get faster to market**

Quickly build cloud solutions practices within your organisation using our range of enablement tools and resources.
